DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-15 and 18-21, drawn to a cash card system for conducting transactions at a point of sale (POS) terminal using a first card identification number and a second card identification number, classified in class 235, subclass 380.

Group II. Claims 22-25, drawn to a method for escrowing transaction between a seller and a buyer including creating payment-specific authentication information, classified in class 235, subclass 379.

2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires, among other things, escrowing transaction between a seller and a buyer including creating payment-specific authentication information. The subcombination has separate utility such as it can be delayed the payment for

goods/services purchased by user(s) until user(s) receives goods/services from the seller.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
